

Price list 2023

All prices quoted are **excluding** 21% VAT.

Perfoframe is a patented construction system consisting of an exclusively developed perfo profile, connecting block and accessories.

The perfo profiles can be firmly joined together with the connecting block for strong structures.

As standard, the perfo profiles are made of 'Maglenis' galvanised steel for use in outdoor applications. However, they can be coated in a colour of your choice at an additional cost.

Perfoframe is a product of Dutch Innovation Systems.
